Peer Review Recruitment

The MDPH Peer Review process relies on talented staff to serve as reviewers of reports and articles contributed by their colleagues. Reviewers regularly report that they enjoy contributing to the quality and consistency of MDPH data reports and analytical articles; authors appreciate the thoughtful input provided.

Peer reviewers are selected from a pool of suitable reviewers throughout MDPH. Reviewers represent all MDPH bureaus, and have a variety of professional backgrounds. While many peer reviewers have MDs or PhDs, some of our very best and most careful peer reviewers do not have advanced graduate degrees. Important skills include knowledge of and experience with: statistical analysis, study design, survey methods, editing, proofreading, visual presentation of data, communication, and risk communication.

We would like to add you to our list of available reviewers and invite you to participate in this valuable process. If you are interested in contributing, please take a moment to tell us about yourself below.

(Please use as much space as needed.)

Name:

Bureau / Program Name:

Public Health / Program Expertise: (please describe)

Content Area Expertise or Interests: (please describe)

Skills:
